ROREND—Dear Standard and the Month health, asking for information as to interestit from the health, asking for information as to interestit from the time farm, it at limit, and we take great obesaure in making the following statement, based upon sear own beer vation and upon information obtained from various persons owning interests in the wells mentioned below rist. The Tart storestead Company has o had Turpedoes apploaded in the Pertine and Kingduny wells of these two wells one had been fluwing and the other pumping nearly 128 barrels, taken together, but they had decreased until both wure yielding but should 8 barrels per day. After the explesion of the Torpato, both commenced to flow and produced about 180 barrels per day, at which rate they still continue.

Three other wells in the same neighborhood have
cent brought up from pumping, in the aggregate about
6 barrols, to producing over 100 barrels per day, and in
casing. One of those its now flowing and the other
wo are pumping. They will, to all approximates, reach
much higher point.

We believe thore has not been a single exception on
the farm there your Torpude has not greatly bow that
